

\* Fidonet Nodelist \*

The FidoNet(r) NodeList, a listing of the systems within FidoNet.  
Copyright 1990, Fido Software. All rights reserved except for the following:

- o This modified version of the FidoNet NodeList is compiled so that computer systems on the Internet/Bitnet can communicate with FidoNet systems.
- o This modified version is for personal use only. It can not be redistributed. No commercial usage of this information is permitted.
- o This is a compilation of individual nodelist segments contributed by the drafters and compilers of those segments. Contribution of these segments to this compilation does not diminish the rights of the contributors.

Other use without express written consent is not allowed. For other use, please contact Fido Software, Box 77731, San Francisco, CA 94107 USA.

Fido(r), FidoNet(r), and the dog with diskette are registered marks of Tom Jennings and Fido Software.

FidoNet is fully coupled into the Internet. You do not need to know any specific gateways, just address the message correctly into the fidonet.org domain, and everything will be routed automatically.

FidoNet addresses can be addressed in the basic format of:

FirstName.LastName@pww.fzz.nxx.zyy.fidonet.org

ww= Point Number (this is usually not needed unless specific to a subsystem)  
zz= FidoNet Node  
xx= FidoNet Network or Region  
yy= FidoNet Zone (Presently only 1 to 5 are valid)

Therefore, as an example, my name David Dodell, resides at FidoNet address 1:114/15. My FidoNet Internet address is:

David.Dodell@f15.n114.z1.fidonet.org

If you have any questions, feel free to drop me a line.

David Dodell  
Domain Administrator, Fidonet.org
